Gain Internationally recognised qualifications from a quality assured, well respected Australian Vocational Education and Training Provider

Access Australia Group Ltd. trading as AST - RTO Registration No: 4603

About Us

Access Skills Training is a division of Access Australia Group (AAG) which is based in the Regional City of Bendigo, north of Melbourne in Victoria, Australia.

- Internationally Quality Accredited organisation (ISO 9001) which has been delivering Australian Education and Training services for more than twenty years.
- Strong capability to partner and develop customised accredited programs overseas, either directly or through auspiced arrangements.
- Nationally accredited through the Australian Skills Quality Authority and is authorised to train and assess an extensive range of courses.
- Strong reputation for quality, innovation, flexibility and partnering skills.
- Providing TVET in government, private schools and colleges.

Our Capability

- 1. Tailor TVET to your needs**
Specialist experts in developing & teaching vocational programs to develop a skilled workforce.
- 2. Train the Trainer**
Can teach your staff to be able to teach and assess Australian skills sets or courses for certification.
- 3. Study Tours**
Provide experiences in Australia to observe and understand Australian TVET and training systems in enterprise and educational environments.
- 4. Consultancy and advice**
Able to assist governments and organisations to develop and implement TVET policy, quality assurance, curriculum development and teaching techniques.

Benefits of Partnering with AST

- Raise your school / college profile.
- At completion of assessment receive an Australian certificate that is internationally recognised.
- Receive quality teaching and assessment that is relevant to industry standards and of high levels of consistency.
- Grow global partnership.
- Student may receive dual qualifications.
- High quality Australian Standards.
- Cost efficient TVET delivery.
- Improve local teacher professional practice.
